

Step 2 - Fitting the Fins

a) With the elastic at the top stand the tube on the fin guide printed on the last page of these instructions and mark the positions of the fins on the outside of the body tube

b) **Lightly** sand the position where the fins will fit, to help the glue stick. Draw a line along the body tube (1) at the positions marked earlier. You can use a door frame to help

c) Apply superglue along one of the lines and place one edge of the fin flat against the tube

d) When dry, repeat for the other fins

e) When all fins are dry, reinforce the joint between the fin and the tube with more glue

f) **Stick the launch lug (6) in the corner between the tube and the fin**

h) Your fins should look like this
